

AN INTRODUCTION TO BUNKERING

Nigel Draffin
First Edition. 2008

Also available
in Spanish

Price: £45 / €50 / US\$80 + carriage

English Edition ISBN: 978-0-9548097-1-3

Spanish Edition ISBN: 978-0-9548097-2-0

An Introduction to Bunkering is an invaluable introduction to the bunker industry. This is a book that will sit comfortably on the desk of anyone who has to deal with the bunkering of ships, whatever their experience or training, where they can find simple answers to complicated questions. It is packed with useful and relevant data, practical illustrations and enough pictures to help anyone understand exactly what bunkering is all about.

'It is a 102-page entry level guide to bunkering, covering all aspects of the marine fuels industry in a simple, easy-to-read style, with many explanatory diagrams and high quality photographs'

Marine Engineers Review

'It is a well written book in very readable language and all of the technical terms are well explained. Illustrations are used to good effect throughout the book and it is essential reading for anyone new to the industry.'

London Matters (Maritime London)

'Its thirteen chapters provide a comprehensive guide to the marine fuel market, covering topics including the physical characteristics of bunker fuel, the specifications of different grades, the methods by which fuel is delivered and the fuel demands and efficiency ratings of marine engines'

Bunkerworld

The Spanish edition contains a comprehensive English-Spanish / Spanish-English bunker terminology glossary. The book has a foreword by Capt M Segar, Director (Port) / Port Master, Maritime and Port Authority of Singapore.

'An Introduction to Bunkering is a valuable educational tool for those just starting out in this industry. It is all you ever wanted to know and more about all things bunkers. The graphs, photographs, flow charts and figures help convey the important concepts. Every supplier, broker, trader, agent and buyer should have a copy on their bookshelf. I wish this book was available when I was teaching!'

Connecticut Maritime Association

About the Author

Nigel Draffin has been involved in shipping for almost 45 years and with the commercial bunker market for some 25 years. He is a founder member of the International Bunker Industry Association (IBIA) and has served several times on its council of management and executive board, most recently as Honorary Treasurer. He is co-ordinator of IBIA's Education Working Group and author of IBIA's *Basic Bunkering Course*. Nigel Draffin is also the Technical Director of the *Oxford Bunker Course*, a member of the Institute of Marine Engineering Science and Technology and Past Master of the Worshipful Company of Fuellers.

AN INTRODUCTION TO FUEL ANALYSIS

Nigel Draffin
First Edition. 2009

Price: £45 / €50 / US\$80 + carriage

ISBN: 978-0-9548097-3-7

An Introduction to Fuel Analysis provides a guide and reference for those who, whilst not specialists in the technical aspects of marine fuels, need to understand the terminology and the reporting used in fuel analysis as part of their work.

'The new 96-page publication has photographs, diagrams, tables and data designed to help the reader through the complexities of fuel specifications and fuel analysis.'

Bunkerworld

This book will help anyone who has any doubts about what can be found in marine fuels and, once found, what to do about it.

It includes some very useful appendices that provide places to go for help, lists of abbreviations and a multi-lingual glossary of the words and terms most often found in fuel test analysis reports.

'The book contains a wealth of information that will enable everyone from the newcomer to the old hand to understand bunker fuels and what they contain, how to test each key parameter and what the test results actually mean, and what happens when problem results appear.'

The Maritime Advocate

Although never a substitute for the huge amount of detail that can be obtained from a professional analyst using a fully-equipped modern laboratory, this book certainly provides a substantial amount of information that should be welcomed and absorbed by anyone involved in any way with marine fuels.

'It brings home the importance of knowing the fuels you are dealing with in a bright, simple and effective way.'

Marine Engineers Review

AN INTRODUCTION TO BUNKER OPERATIONS

Nigel Draffin. First Edition. 2010

Price: £60 / €65 / US\$100 + carriage

ISBN: 978-0-9548097-4-4

NEW FOR
2010

This detail-packed book focuses on the important day to day tasks involved in bunkering operations. It covers accurate measuring and sample taking, fuel delivery by pipeline, barge, road and other methods. It also offers a comprehensive overview of bunkering procedures, from the different types and sizes of equipment used, to access and communications issues and health and safety measures. No-one involved in bunkering operations - on land or at sea - should be without a copy.

BUNKERS An Analysis of the Practical, Technical and Legal Issues

Chris Fisher and Jonathan Lux
Third Edition. 2004

Price: £125 / €140 / US\$200 + carriage

ISBN: 0-9548097-0-X

'All aspects of the industry are covered in detail, in accessible language. The section on legal issues and dispute resolution will be of particular interest to lawyers, given what seems to be a global trend towards deteriorating bunker fuels'

Maritime Advocate

'Understanding all the difficulties of handling and using marine fuel is vital for a safe and well-run ship, and every marine engineer and student of marine engineering will find the practical and technical content helpful and informative'

Lloyd's List

The world's most authoritative book on marine fuels, **Bunkers** is a must for maritime lawyers, marine engineers, insurers, shipping and bunkering companies, fuel purchasers and charterers – in fact anyone involved in handling bunker fuels or dealing with expensive claims.

'This book would be warmly welcomed by anyone connected with the shipping industry: it ought to find a place within elbow distance of all practitioners and students of maritime law'

The Commonwealth Lawyer

Covering almost every aspect of bunkering in a concise, detailed but easy-to-read format, it offers almost 400 pages of highly-accessible text, charts, diagrams and graphs which make it the most comprehensive training tool for readers at any level of expertise, knowledge and experience of bunkering.

'This book is a must for the bookshelves of everyone involved with the production, purchase, sale, supply, transport and use of marine fuels'

Society of Naval Architects & Marine Engineers

About the Authors

Chris Fisher served as Chief Engineer and superintendent engineer with Texaco. In 1984, he began working as a surveyor and consultant, specialising in liquid cargo and bunker quality disputes. He has worked as Regional Manager in Europe for DNV Petroleum Services and BSI-Inspectorate, and is now Director of Bunker Claims International. In 2009, Chris was elected Chairman of the International Bunker Industry Association (IBIA).

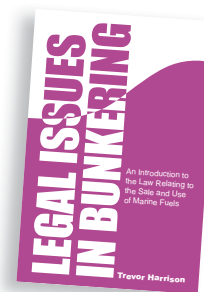

Chris Fisher

Jonathan Lux

Jonathan Lux is a Solicitor and has been a Partner in Ince & Co International Law Firm in London since 1983. He is a leading expert in shipping and commercial law with particular expertise in bunkers. *The International Who's Who of Shipping and Maritime Lawyers 2009* lists 'Most highly regarded individuals' and says about Jonathan: 'Leads the voting worldwide with unanimous praise coming from all corners of the globe'. He is an accredited mediator and receives many appointments as mediator, boasting a 90% success rate. Jonathan is also a leading expert advising bunker suppliers, shipowners and charterers.

LEGAL ISSUES IN BUNKERING An Introduction to the Law Relating to the Sale and Use of Marine Fuels

Trevor Harrison
First Edition. 2010

Price: £45 / €50 / US\$80 + carriage

ISBN: 978-0-9548097-6-8

NEW FOR
2010

Legal Issues in Bunkering offers a wealth of information on key legal aspects of bunkering, including contracts, defaults, ship arrest and dispute resolution; there is also a section dealing with international conventions and national legislation on environmental issues relevant to bunkering. While not intended as a substitute for detailed legal advice, this book will introduce the reader to the relevant law and provide guidance on why and when professional help may be required.

About the Author

Trevor Harrison qualified as a barrister over 30 years ago and now practises as a maritime arbitrator, mediator and legal consultant with a particular expertise in bunkering. Before becoming Principal Legal Advisor to Tramp Oil & Marine in 1984, he practised at the English Bar, worked for a P&I club and a firm of marine consultants.

AN INTRODUCTION TO BUNKER CREDIT RISK

Adam Dupré
First Edition. 2010

Price: £45 / €50 / US\$80 + carriage

ISBN: 978-0-9548097-5-1

NEW FOR
2010

An Introduction to Bunker Credit Risk is an essential tool for all those responsible for making credit decisions and assessing counterparty risk when buying or selling marine fuels. Presenting a complex subject in a simply-written and highly-effective format, this book also provides a comprehensive foundation for anyone involved in any aspect of credit management.

About the Author

Adam Dupré has some 25 years' experience in company research, analysis and investigation for the maritime sector. He was one of the founders and later Managing Director of MRC Business Information Group (now LMIU) and, in 2005, he co-founded Ocean Intelligence. He has written and lectured extensively on counterparty credit risk assessment in the maritime sector and is a specialist on gathering commercial information on Chinese companies.

BUNKERSPOT Independent Intelligence for the Global Bunker Industry

Petrospot Limited
Bi-monthly magazine
+ online news service

Price: £250 / €280 / US\$400
(carriage included)

ISSN: 1741-6981

In a world where information overload can be overwhelming, *Bunkerspot* magazine, the renowned journal of record, is at the forefront of bringing important bunkering issues to light. Together with its online news and pricing service, *Bunkerspot* is now essential for keeping up-to-date with all of the key developments in the bunker industry.

UNRIVALLED KNOWLEDGE

Experienced bunker industry journalists and a team of highly-respected experts write *Bunkerspot*, resulting in the most knowledgeable bunker-specific reporting in the world.

It provides a comprehensive print and online source of quality information for all professionals working in the international bunker industry.

ONLINE NEWS

www.bunkerspot.com is a global, 24-hour, 7-days a week, constantly updated news service. There is also a fully searchable archive with over 10,000 pages of historical news articles dating back to early 2004.

FREE PRICE INDICATIONS

Free daily bunker price information is supplied by our unique brokers panel, making it one of the most reliable indicators available. Prices are updated daily for the 16 key worldwide ports and can be quickly and easily accessed online. Historical prices are also available to subscribers.

Why Bunkerspot is the Industry's Choice...

- 6 bi-monthly magazines
- Exclusive features on key industry issues
- 24/7 web-based news service
- Free daily prices for the 16 most influential ports
- Fully searchable archive of all news stories published since its launch in February 2004
- Channels: key areas split into information channels for easy access to relevant articles
- Geographic Sections under Country Profiles and Regional Spotlights
- Free job listings for subscribers
- Subscribers in over 80 countries

About Petrospot

Petrospot Limited is a dynamic independent publishing, training and events organisation focused on the maritime, energy and transportation industries.

Through its books, magazines, online news services, training courses, seminars and major events, Petrospot aims to provide a complete, accurate and always independent view of the international marine fuels industry and to provide true value for money.

Our Publications

Petrospot publishes the world's most authoritative books on marine fuels plus two leading international magazines:

- *Bunkerspot*
- *Cargo Security International*

Each is fully supported by 24/7 electronic news and searchable archive services.

Our Training Events

Petrospot organises some of the most popular courses including:

- *The Oxford Bunker Course*
- *The Piraeus Bunker Course*
- *Petrospot Bunker Seminars*

Our Conferences

Petrospot organises some of the leading bunker conferences in the world, including:

- *Maritime Week Americas*
- *Oil & Shipping Africa*

Plus events managed with our sister company, Bunker Events Limited:

- *The Bunkering Symposium*
- *ARACON*
